Summary

Office Home & Business 2016 is made to help you achieve more with time-saving features, a new modern look, built-in collaboration tools, and the power of Outlook for email, calendars, and contacts. Plus, you can save your documents in the cloud on OneDrive and access them from anywhere.

What's new in this release of Office?

[Word 2016](#), [Excel 2016](#), PowerPoint 2016, [OneNote 2016](#) and [Outlook 2016](#).

Be a power Office user – the easy way. Type what you want help with in the new Tell Me box on the ribbon and it will tell you how to do it.

New themes let you choose the Office experience that's right for you. Dark and Dark Grey themes provide high contrast that's easier on the eyes, and the Colourful theme gives you a modern look that's consistent across your devices.

Pull content from PDFs straight into Word. Open PDFs and edit paragraphs, lists, and tables just as you do in familiar [Word](#) documents.

New modern charts and graphs in [Excel](#) give you more ways to explore and tell compelling stories with your business data. [Excel](#) recommends charts best suited for your data, and gives you a preview how your data will look.

In [Excel](#), you can now create basic forecasts on your data series with one click to visualize future trends.

Share your [PowerPoint](#) presentation over the web by sending a link to it or using the free Office Presentation Service to deliver it, so your audience can join you from anywhere.

Embed [Excel](#) spreadsheets, diagrams, audio clips, videos, and almost any other kind of file in your [OneNote](#) notebooks. Your notes are saved, searchable, and synced to [OneNote](#) apps on your other devices, so you can use or share them from anywhere.

Respond faster with inline replies—replies positioned right within the body of the original message—in [Outlook](#). Just type your response in the Reading Pane.
